

ROOHAN KHAN

Backend Developer — Laravel, Django, REST APIs

Karachi, Pakistan | +92 315 2759433 | roohank8@gmail.com

linkedin.com/in/roohan-khan8 | github.com/roohankhan8 | portfolio-roohan.netlify.app

PROFILE

Backend developer with production experience in Laravel/PHP and Python/Django. Designs relational data models, REST APIs, authentication and role-based access, and payment and webhook integrations for marketplace, ecommerce and multi-role admin products. Optimizes SQL on high-volume screens and works closely with frontend, mobile and product teams. DataCamp-certified in AI engineering for developers.

TECHNICAL SKILLS

Languages: PHP, Python, SQL, JavaScript, TypeScript

Backend & APIs: Laravel, Django, Django REST Framework, REST API design, authentication & RBAC, payment/webhook integrations, Celery/Redis

Databases: PostgreSQL, MySQL, MongoDB, Firebase, relational data modeling, query optimization

Admin & CMS: Laravel Nova, Filament, Statamic

Tools: Git/GitHub, Docker (basic), CI/CD exposure, code review, agile collaboration

EXPERIENCE

Associate Software Engineer – Backend | K-Labs Feb 2026 – Present

- Build and maintain Laravel backends and RESTful APIs for web and mobile products, working with frontend, mobile and product teams to turn requirements into validated API behavior.
- Built admin panels and content workflows with Laravel Nova, Filament and Statamic.

Backend Developer (Part-time) | Digital Marketing 30 Jun 2025 – Jul 2026

- Migrated a legacy PHP portal into a modular Laravel architecture while preserving production behavior.
- Implemented role-based access for 5 user roles across project and administrative workflows.
- Optimized SQL access on high-volume screens, reducing unnecessary production queries.
- Built APIs and file workflows for plan management, document review, submissions and approval queues.

Backend Developer | NED Scholars Logbook (Django) 2023 – 2024

- Built a Python/Django backend with relational data models, authentication and role-based access for a university thesis and research logbook system.

PROJECTS

Multi-Vendor Ecommerce Platform, Bahrain (Laravel, REST APIs) | K-Labs client project, confidential, in development

- Develop Laravel APIs and database-backed workflows serving the customer app, vendor operations and admin tooling, designed around multiple vendors rather than a single-store model.
- Model vendor catalogs, carts, checkout, orders and status transitions.
- Implemented payment checkout with webhook verification and explicit order states (pending, paid, failed, refunded).

Service-Booking Platform, customer app + vendor app (Laravel, REST APIs) | K-Labs client project, confidential

- Built backend workflows shared by the customer booking experience and the vendor application, keeping one booking lifecycle and its business rules consistent across customer, vendor and admin roles.
- Collaborated with mobile, frontend and product teammates to translate requirements into API behavior and validation rules.

Transaction Reconciliation Platform (Django, DRF, PostgreSQL, Celery/Redis, React) |

github.com/roohankhan8/ubl

- Built a Django REST backend that imports transaction files, validates and normalizes them, and reconciles them in tracked runs (pending, processing, completed, failed).
- Kept business logic in a service layer, with Decimal-based money handling, database constraints, role-based access and an append-only audit trail.

Larvis Agent – AI Content Platform (Laravel, Inertia.js, React)

- Built a multi-workflow product with REST endpoints, an interactive React frontend and role/session-based access, covering database, API and UI layers.

EDUCATION & CERTIFICATIONS

BS, Computational Finance – NED University of Engineering & Technology, Karachi | 2022 – 2026 | GPA 3.2

Associate AI Engineer for Developers – DataCamp (2026) | Python – DataCamp | SQL – Kaggle | Web Development – SoloLearn

Languages: English (Fluent)
