

ROOHAN KHAN

Forward Deployed Engineer — Full Stack, APIs & AI Integrations

Karachi, Pakistan | +92 315 2759433 | roohank8@gmail.com

linkedin.com/in/roohan-khan8 | github.com/roohankhan8 | portfolio-roohan.netlify.app

PROFILE

Full stack engineer who turns business requirements into working software: data models, REST APIs, third-party and payment integrations, and the React/Vue interfaces on top. Experience across marketplace, ecommerce and multi-role admin products, working directly with product, mobile and frontend teams. DataCamp-certified in AI engineering for developers, with hands-on work on an LLM-based content platform. Comfortable moving from a rough problem to a deployed solution.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL

Frontend: React, Next.js, Vue 3, Inertia.js, responsive UI development

Backend & Integrations: REST API design, third-party and payment/webhook integrations, authentication & RBAC, Django, Laravel; growing with Node.js/Express

AI & Data: LLM-based product work (Laravel AI SDK), Python data pipelines (pandas, scikit-learn, statsmodels); learning LLM API integration and vector databases

Databases & Tools: PostgreSQL, MySQL, MongoDB, Firebase, Git, Docker (basic), CI/CD exposure, cloud deployment basics

EXPERIENCE

Associate Software Engineer – Backend | K-Labs Feb 2026 – Present

- Own features end to end across Laravel APIs and Vue 3 / Inertia.js interfaces for web and mobile products.
- Build and maintain Laravel backends and RESTful APIs for web and mobile products, working with frontend, mobile and product teams to turn requirements into validated API behavior.
- Built admin panels and content workflows with Laravel Nova, Filament and Statamic.

Backend Developer (Part-time) | Digital Marketing 30 Jun 2025 – Jul 2026

- Migrated a legacy PHP portal into a modular Laravel architecture while preserving production behavior.
- Implemented role-based access for 5 user roles across project and administrative workflows.
- Optimized SQL access on high-volume screens, reducing unnecessary production queries.
- Built APIs and file workflows for plan management, document review, submissions and approval queues.

Backend Developer | NED Scholars Logbook (Django) 2023 – 2024

- Built a Python/Django backend with relational data models, authentication and role-based access for a university thesis and research logbook system.

PROJECTS

Service-Booking Platform, customer app + vendor app (Laravel, REST APIs) | K-Labs client project, confidential

- Turned requirements from customer, vendor and product stakeholders into a single backend booking lifecycle shared by two apps and an admin.
- Worked with mobile, frontend and product teammates to define API behavior and validation rules.

Multi-Vendor Ecommerce Platform, Bahrain (Laravel, REST APIs, payments) | K-Labs client project, confidential, in development

- Build the APIs behind customer, vendor and admin workflows: catalogs, carts, checkout and orders.
- Implemented payment checkout with webhook verification and explicit order states (pending, paid, failed, refunded).

Larvis Agent – AI Content Platform (Laravel, Inertia.js, React)

- Built a multi-workflow product with REST endpoints, an interactive React frontend and role/session-based access, covering database, API and UI layers.

Transaction Reconciliation Platform (Django, DRF, PostgreSQL, Celery/Redis, React) |

github.com/roohankhan8/ubl

- Built a Django REST backend that imports transaction files, validates and normalizes them, and reconciles them in tracked runs (pending, processing, completed, failed).
- Kept business logic in a service layer, with Decimal-based money handling, database constraints, role-based access and an append-only audit trail.

EDUCATION & CERTIFICATIONS

BS, Computational Finance – NED University of Engineering & Technology, Karachi | 2022 – 2026 | GPA 3.2

Associate AI Engineer for Developers – DataCamp (2026) | Python – DataCamp | SQL – Kaggle | Web Development – SoloLearn

Languages: English (Fluent)
