

ROOHAN KHAN

Front-End Developer — React, Vue 3, Next.js

Karachi, Pakistan | +92 315 2759433 | roohank8@gmail.com

linkedin.com/in/roohan-khan8 | github.com/roohankhan8 | portfolio-roohan.netlify.app

PROFILE

Developer with hands-on front-end experience in React, Vue 3 and Inertia.js, building responsive, interactive interfaces for marketplace, ecommerce and admin products. Comfortable on the full stack, so UIs fit cleanly with the APIs behind them (Laravel, Django, REST). Works closely with backend, mobile and product teammates and is extending into Next.js and TypeScript.

TECHNICAL SKILLS

Frontend: React (hooks, functional components), Vue 3, Next.js, Inertia.js, HTML5, CSS3, responsive UI, component-driven design

Languages: JavaScript, TypeScript, PHP, Python, SQL

Backend & APIs: REST API design and consumption, authentication & RBAC, third-party integrations, Laravel, Django

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Tools: Git/GitHub, code review, Docker (basic), agile collaboration

EXPERIENCE

Associate Software Engineer – Backend | K-Labs Feb 2026 – Present

- Build interactive product UIs with Vue 3 and Inertia.js on top of Laravel APIs for web and mobile products.
- Work with mobile and frontend teammates to turn product requirements into working screens and validated API behavior.
- Built admin panels and content workflows with Laravel Nova, Filament and Statamic.

Backend Developer (Part-time) | Digital Marketing 30 Jun 2025 – Jul 2026

- Built interactive admin and workflow screens for project plans, document review, submissions and approval queues.
- Implemented role-based views and access for 5 user roles.
- Migrated a legacy PHP portal into a modular Laravel architecture while preserving production behavior.

Backend Developer | NED Scholars Logbook (Django) 2023 – 2024

- Built Django views and templates with authentication and role-based access for a university research logbook system.

PROJECTS

Multi-Vendor Ecommerce Platform, Bahrain (Laravel, REST APIs) | K-Labs client project, confidential, in development

- Develop the Laravel APIs behind the customer app, vendor operations and admin tooling for a platform designed around multiple vendors.
- Cover vendor catalogs, carts, checkout and order status flows, including payment checkout with webhook verification.

Service-Booking Platform, customer app + vendor app (Laravel, REST APIs) | K-Labs client project, confidential

- Built backend workflows shared by the customer booking experience and the vendor app, keeping one booking lifecycle consistent across both interfaces and admin.

Larvis Agent – AI Content Platform (Laravel, Inertia.js, React)

- Built a multi-workflow product with REST endpoints, an interactive React frontend and role/session-based access, covering database, API and UI layers.

EDUCATION & CERTIFICATIONS

BS, Computational Finance – NED University of Engineering & Technology, Karachi | 2022 – 2026 | GPA 3.2

Associate AI Engineer for Developers – DataCamp (2026) | Python – DataCamp | SQL – Kaggle | Web Development – SoloLearn

Languages: English (Fluent)
